Upgraded 3 million pixels for an even clearer display

Mi 360° Home Security Camera 2K Pro Newly upgraded 3 million pixels, up to 2304×1296 resolution, for clarity in every frame.* Standard HD resolution: $1920 \times 1080=1080$ p (2 million pixels); Upgraded HD resolution: $2304 \times 1296=1296$ p (3 million pixels)

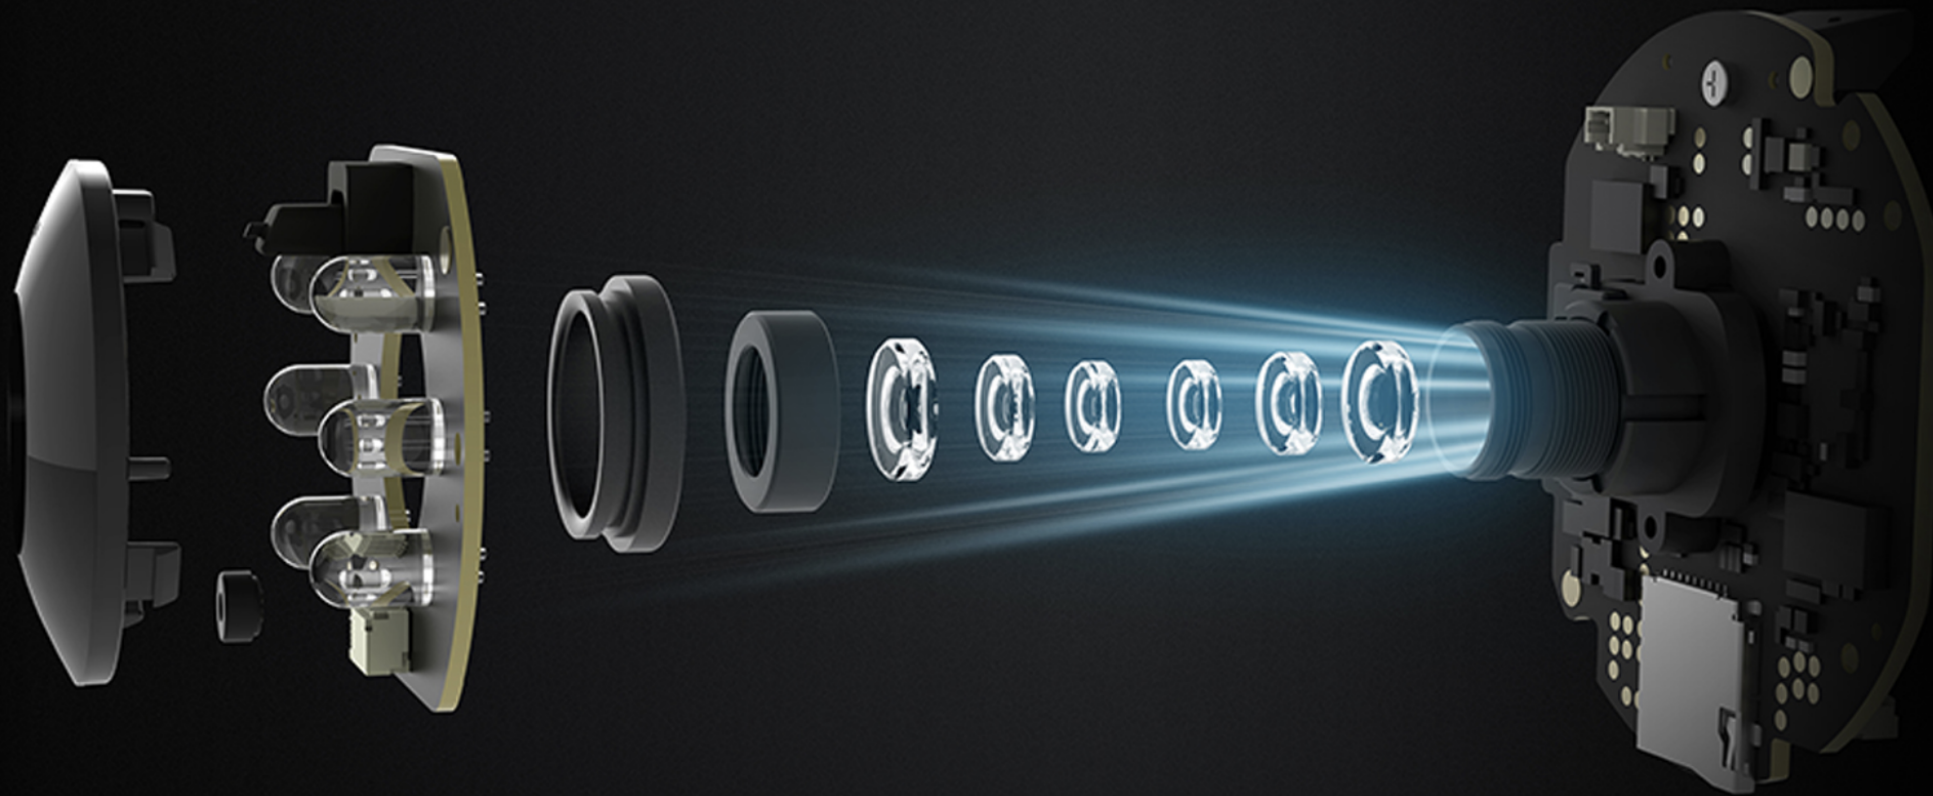

1080p

1296p

F1.4 large aperture and 6P lens for an excellent image capturing experience

The F1.4 large aperture lens lets significantly more light enter, capturing detailed images even in low-light conditions;
The fully upgraded lens effectively reduces light refraction for clearer, more detailed images

Enhanced infrared night vision for clear images even in low-light

The 940-nm infrared light with no visible red glow leaves you and your family to sleep undisturbed; features a high-sensitivity image sensor, and displays colour video in low-light

Switches to black and white video in low-light conditions.

Full-colour camera in non-low-light conditions

Still displays colour video in low-light conditions

Mi 360° Home Security Camera 2K Pro

Dual-microphone noise reduction for clearer two-way voice calling

Supports two-way real-time voice calling, fitted with dual microphones that use active noise reduction technology to effectively reduce speaker echo, and enhance your call experience

On-screen camera output display, keep an eye on what matters to you with any time, any place remote access to video output on your smartphone, tablet, and Mi Smart Clock*.

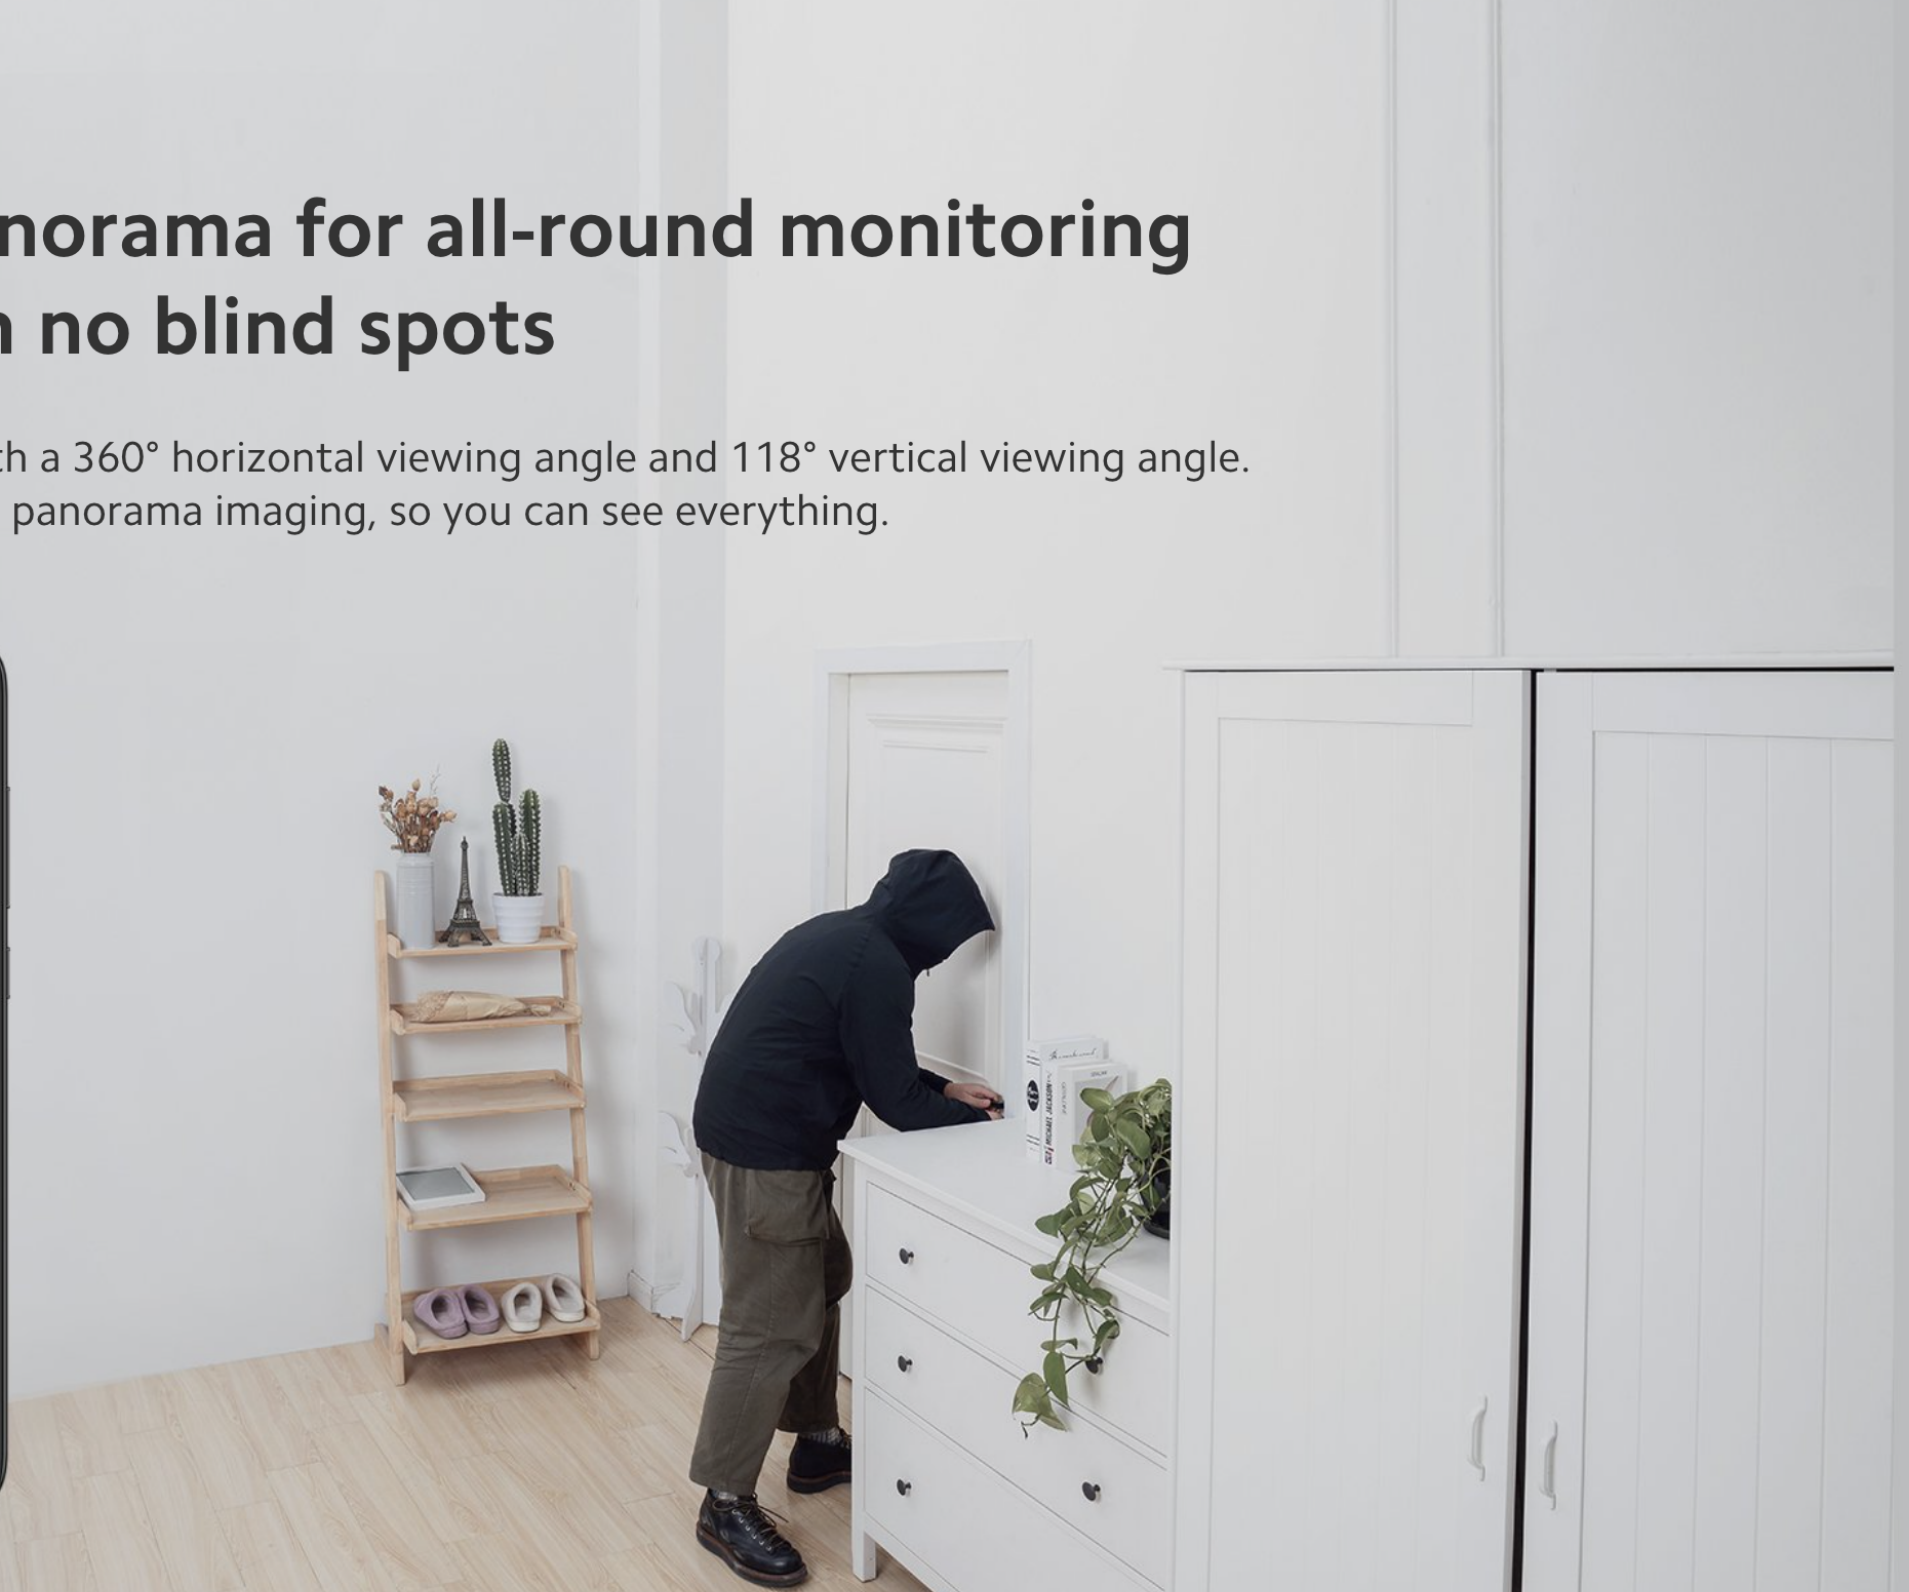

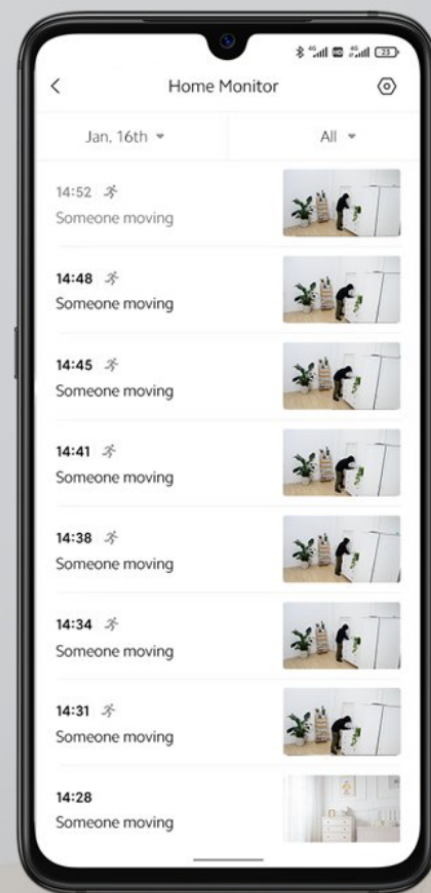

Simply ask your Mi Smart Clock to view real-time video output from your camera.

* Mi Smart Clock and other devices that can be linked to this product must be purchased separately.

360° pan-tilt-zoom panorama for all-round monitoring with no blind spots

Features a dual-axis pan-tilt-zoom motor, with a 360° horizontal viewing angle and 118° vertical viewing angle.
Mi Home app control and panorama imaging, so you can see everything.

One-key physical shield for personal privacy protection

When you don't want camera monitoring enabled, you can enable the physical shield via the Mi Home app. Once enabled, the camera lens will automatically rotate downwards inside of the case to protect your privacy.

Dual-band Wi-Fi connection, with no lag

Supports 2.4 GHz/5 GHz dual-band Wi-Fi connections, reduces signal interference, improves transmission speed, and provides a more stable connection with no lag.

The built-in Bluetooth gateway enables smart connections

The Mi 360° Home Security Camera 2K Pro features a built-in Bluetooth gateway.
Connect Bluetooth devices to view device data via the Mi Home app.
Access settings to link your device with other Xiaomi smart devices.

Seamless viewing that saves storage space

New-generation H.265 video encoding technology enables seamless viewing with no change to network conditions, saves bandwidth, and provides a clear and detailed picture.

H.265 videos require only 50% of the storage space required for traditional H.264 videos at the same pixel and data rate, so you save half the storage space.

50%^{*} ↓

Saves 50% video storage space

50%^{*} ↓

Saves 50% bandwidth

Supports standard and inverted mounting, with 180° screen rotation

Includes screw-in base accessories for easy installation. For inverted mounting, rotate the screen in camera settings to display the picture normally

Three storage methods for increased security

Supports three storage methods, a local Micro SD card, NAS devices and the cloud, so you can back up your data with peace of mind.

Local Micro SD card
Up to 32 GB of
storage

Historical video back-
ups from the Micro
SD card

Free 7-Day Rolling
Cloud Storage of
Motion-Triggered
Video Clips

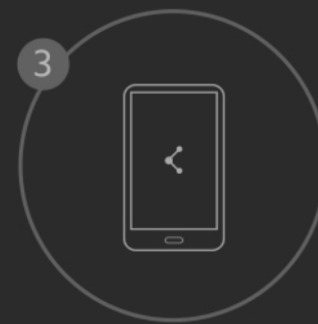

Enable your security camera in three simple steps

1
Download the Mi Home app

2
Power on the Mi 360°
Home Security Camera 2K
Pro

3
Open the app, search for
and connect to the device
to use it normally
