

Mi Motion-Activated Night Light 2

360° magnetic rotation accompanies you all night

Magnetic attraction design

Can be placed anywhere, can also be used as a flashlight

Rotates 360° to diffuse light

Install and use anywhere

Two adjustable brightness settings

Low for soft, subdued lighting and High for bright, clear lighting

365-day long-lasting batteries

Minimal energy use

Light sensor + infrared detection

Wide 120° sensor area automatically turns on when someone approaches

2800K warm yellow light

No detectable flicker, no harmful blue light

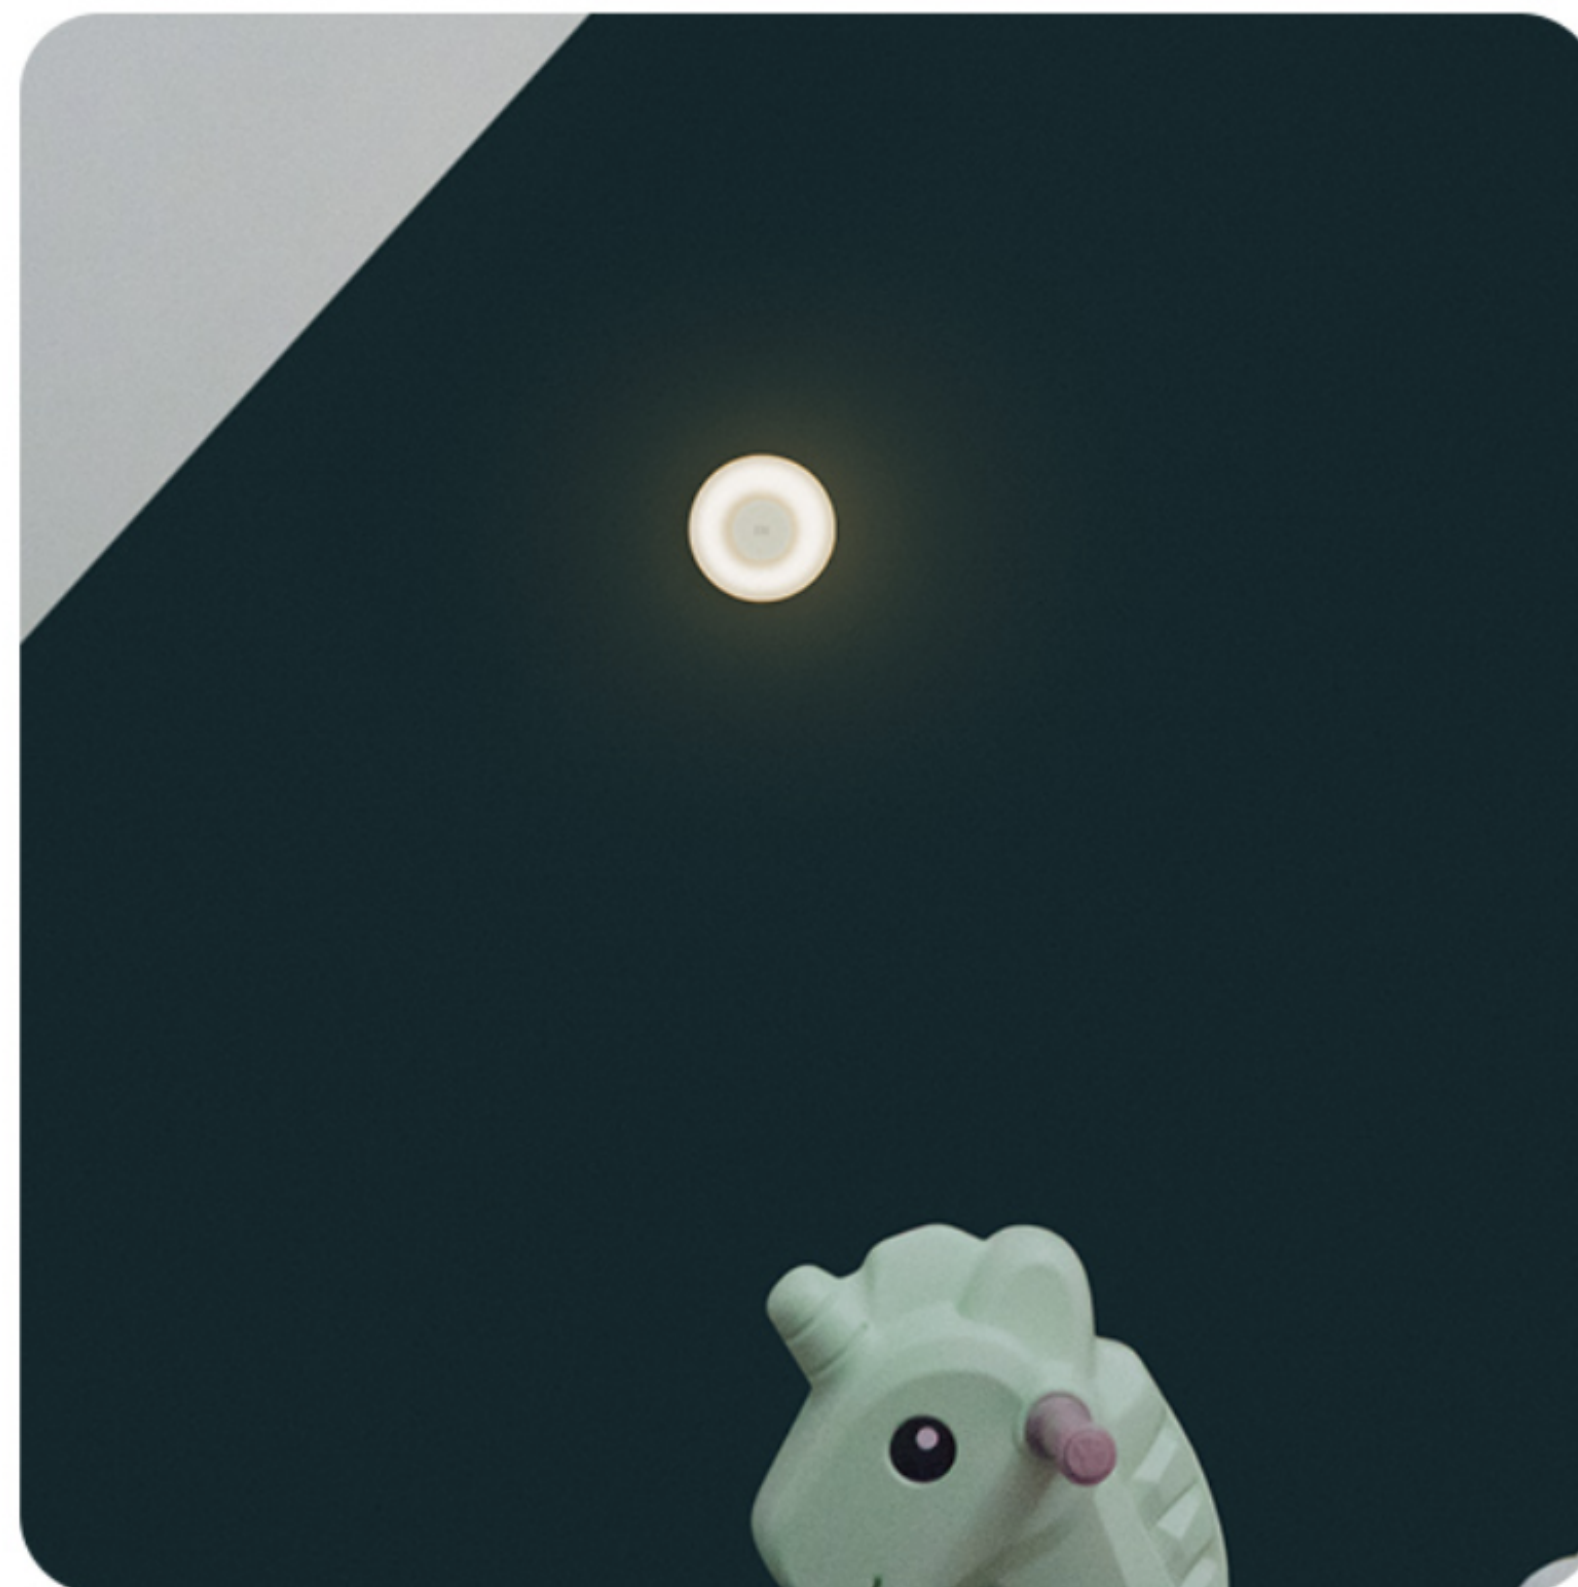

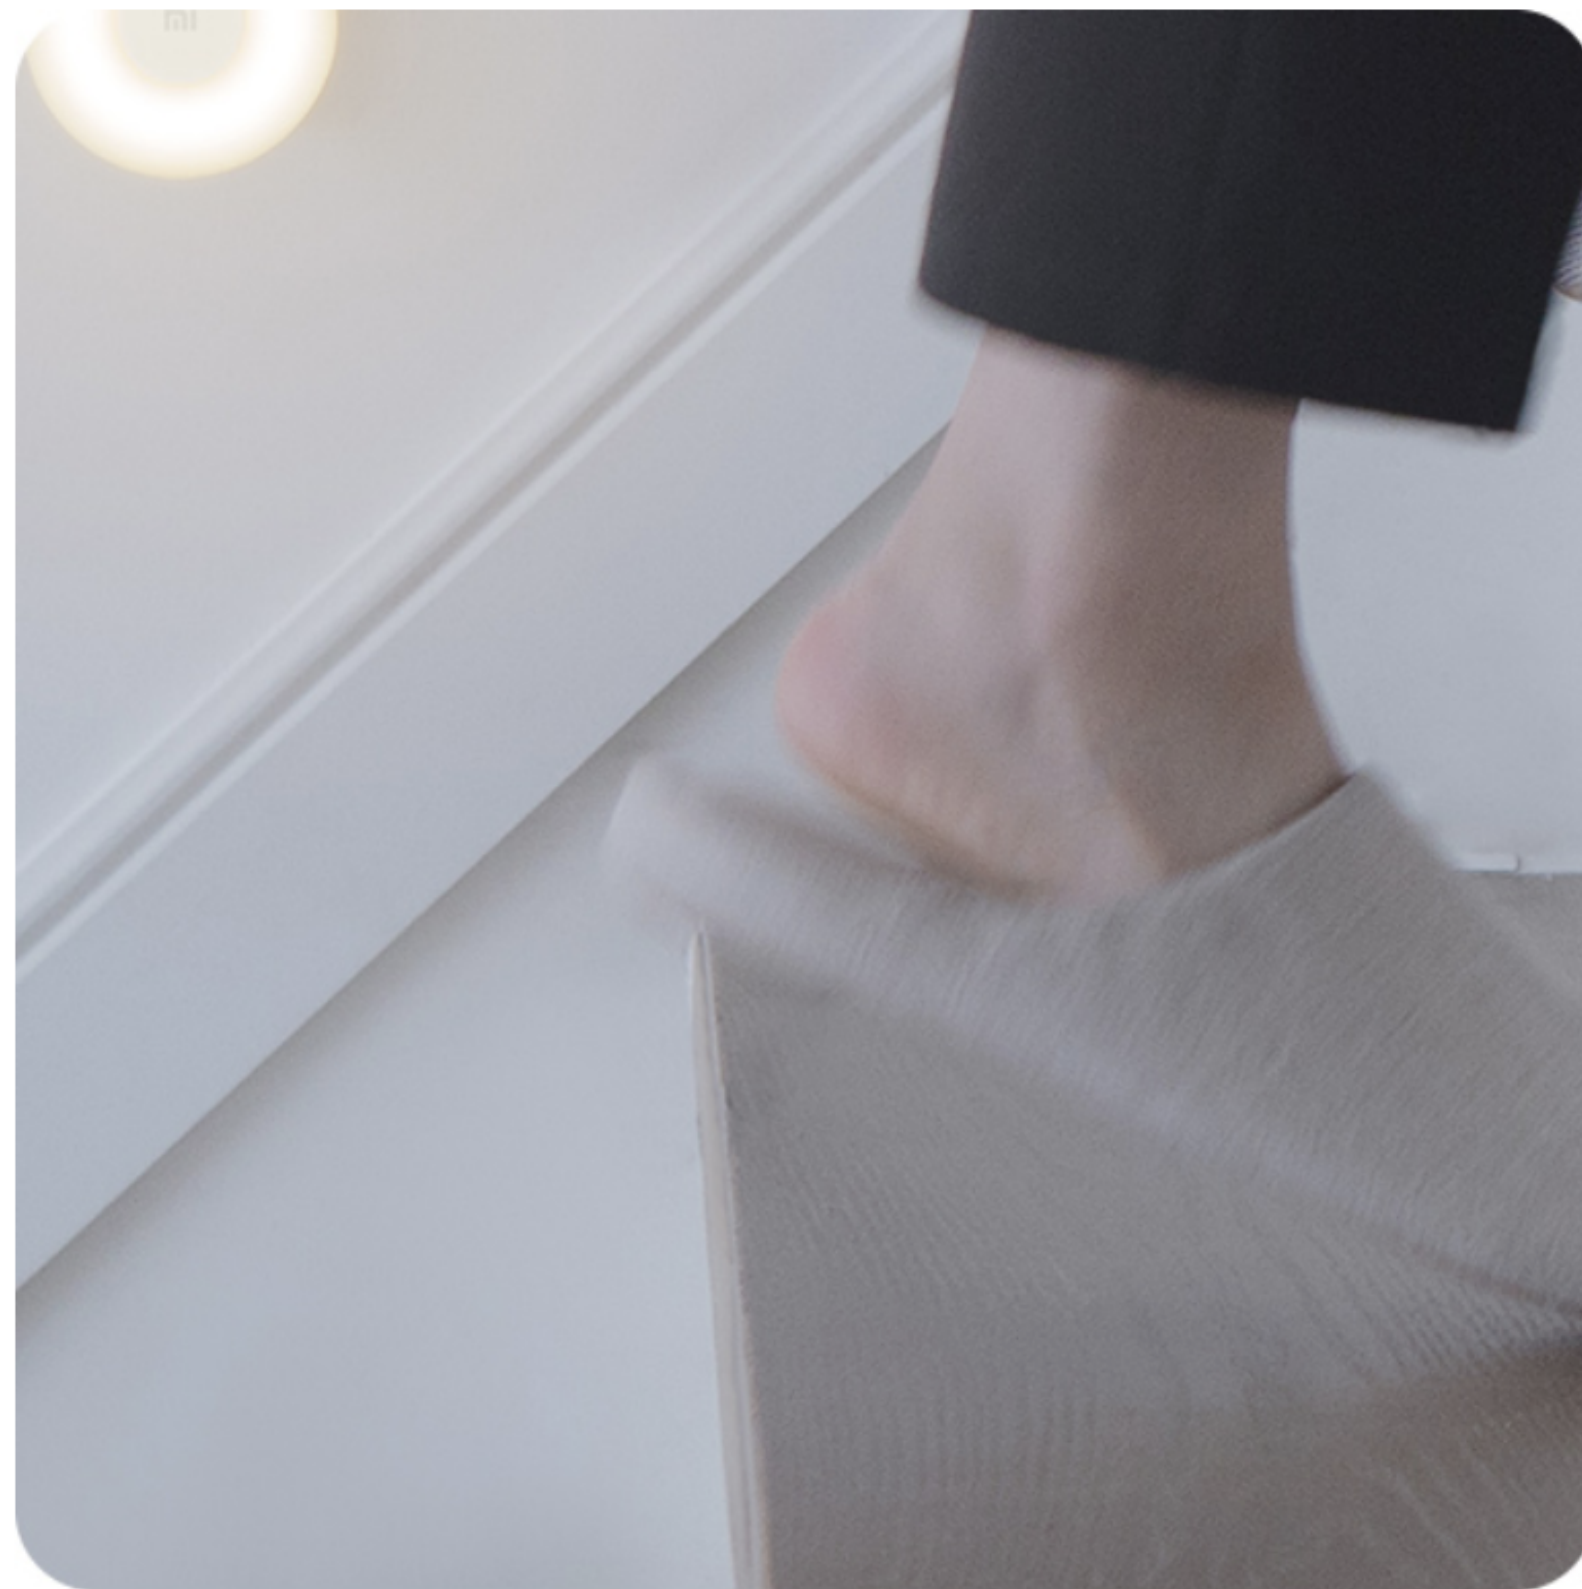

Innovative magnetic design Warm, soft light in your palm

This brand new portable lamp features innovative magnetic design. When placed on its base, the lamp stays stable but can be easily lifted and moved when needed. Soft light guides you safely through dark environments and fits in your palm.

Portable or stationary Provides extra light when you need it

Mi Motion-Activated Night Light 2's angled base can be easily placed on top of nightstands and other desks. The base's special adhesive* allows you to firmly fix the light on the sides of stairs and hallways, in the corners of beds, on bathroom walls, next to your child's bed, inside cupboards or drawers and much more.

Rotates 360° to diffuse light Fully adjustable to illuminate any corner

The hemispherical lamp and magnetic base combine to provide 360° adjustable light distribution. Adjust this versatile light to suit your needs and install it wherever more light is needed.

Two adjustable brightness settings* Low for soft, subdued lighting and High for bright, clear lighting

Mi Motion-Activated Night Light 2 has two adjustable brightness settings. Low setting; It provides a soft and warm light that is suitable for use at night and does not tire the eyes. The high setting is suitable for providing light in dark areas and easily illuminates your surroundings.

Dual adjustable brightness level testing, Waltek Services Test Group Ltd. carried out by Report number: WTF19F06041103N.

Ultra-low power consumption Runs up to 360 days without recharging*

The cordless design eliminates cable tangles and keeps your wall sockets free. Mi Motion-Activated Night Light 2 gives you light for 365 nights.

*Turned on at Low brightness for 15 seconds, 15 times a day. These data are provided by Yeelink lab. Report number: 20190625001.

Built-in dual sensors, 120° wide sensor area* Gives you a clear view in every direction you go

Dual light sensors, infrared sensing and wide 120° sensing area activate light only when people or motion are detected. It supports real-time detection. When the sensor does not detect people or motion for 15 seconds, it automatically turns off to save power, which is useful.

*When the logo is facing down, the sensor range is 0-6 meters forward, 120° horizontally and 0-2.5 meters sideways. Testing of this sensor was done by Waltek Services Test Group Ltd. carried out by Report number: WTF19F06041103N.

*The accuracy of the sensor is affected by the ambient temperature within the sensor's range being close to human body temperature. To ensure the best experience, do not use the device in high temperature environments that regularly exceed 35°C.

No detectable flicker*, no harmful blue light* Enhanced eye protection

You can get up at night without disturbing anyone, as it has warm and subdued 2800K yellow light* that does not produce visible flicker and emit no harmful blue light.

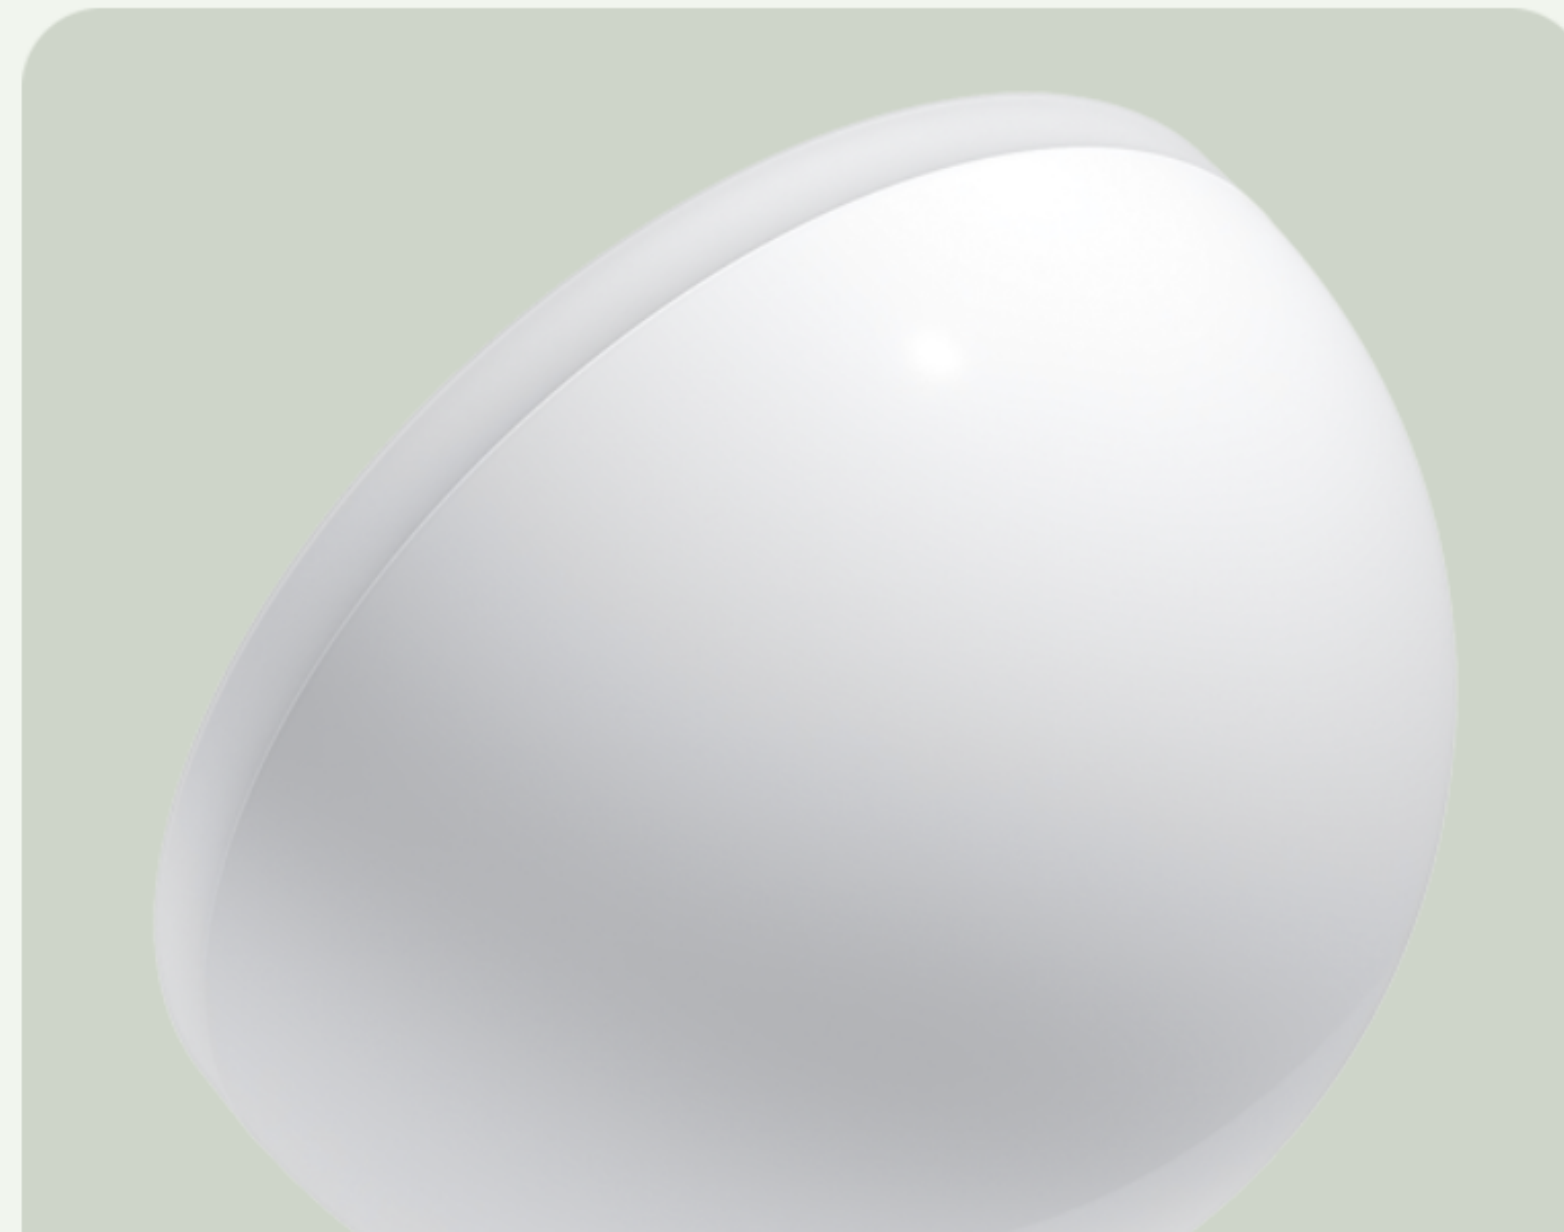

*Visible flicker test, Waltek Services Test Group Ltd. carried out by Report number: WTF19F06043300N.

*Harmful blue light test was carried out by Vkan Certification & Testing Institute (CVC). Report number: WTS2019-9586-2.

*2800K light test, Waltek Services Test Group Ltd. carried out by Report number: WTF19F06041103N.

Small, compact night light with minimalist design Always there when you need it

Environmentally friendly ABS plastic* Durable, reliable quality

Environmentally friendly material testing, Waltek Services Test Group Ltd. carried out by Report number: WTF19F05031551C.
