

Mi Smart LED Bulb Essential

(White and Color)

Add color to your home

16 million colors | Adjustable brightness and color temperature | Smart control

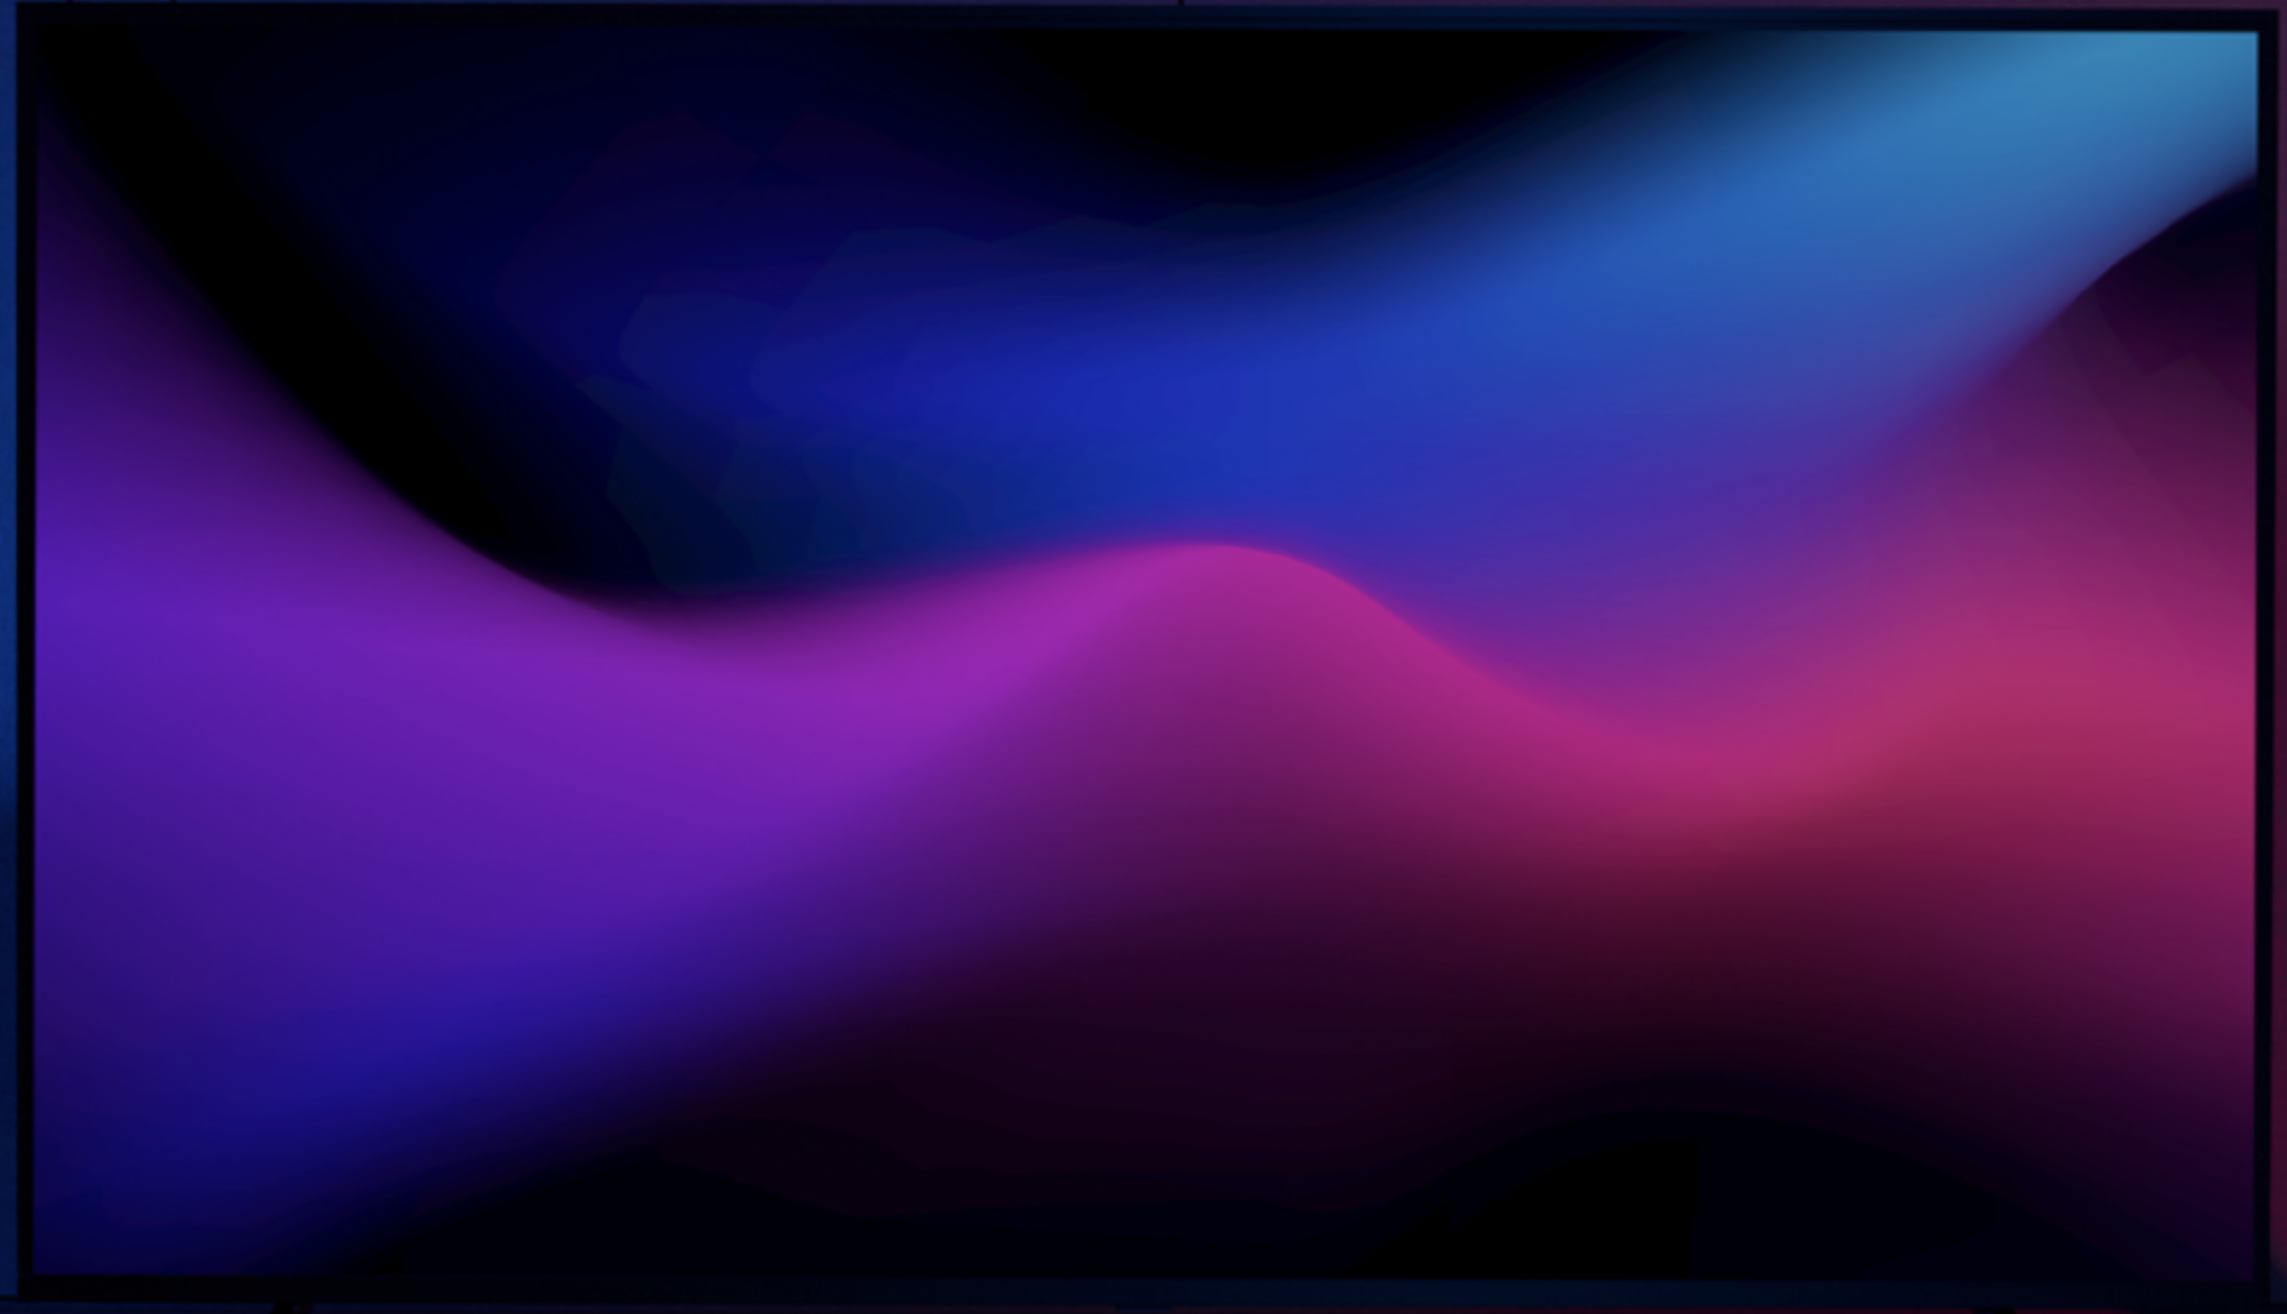

Optimized optical profile provides highly balanced illumination in 16 million colors

—
The Mi Smart LED Bulb uses highly integrated, colorful LEDs and an optimized optical profile for more evenly dispersed mixed light with perfect tones.

Fully customizable bright lights and vibrant colors

—
In Flow mode, the lights constantly change colors and stir your emotions throughout the night. Add your favorite smart modes to presets via the app and get personalized lighting options for every situation.

Adjustable brightness and color temperature to meet your daily needs

—

Daylight mode allows you to freely adjust the brightness and color temperature of Mi Bulb from bright, cool white light to comfortable, warm yellow light. Customize your lighting to fit any situation in your daily life

Bright, cool white light

comfortable daylight

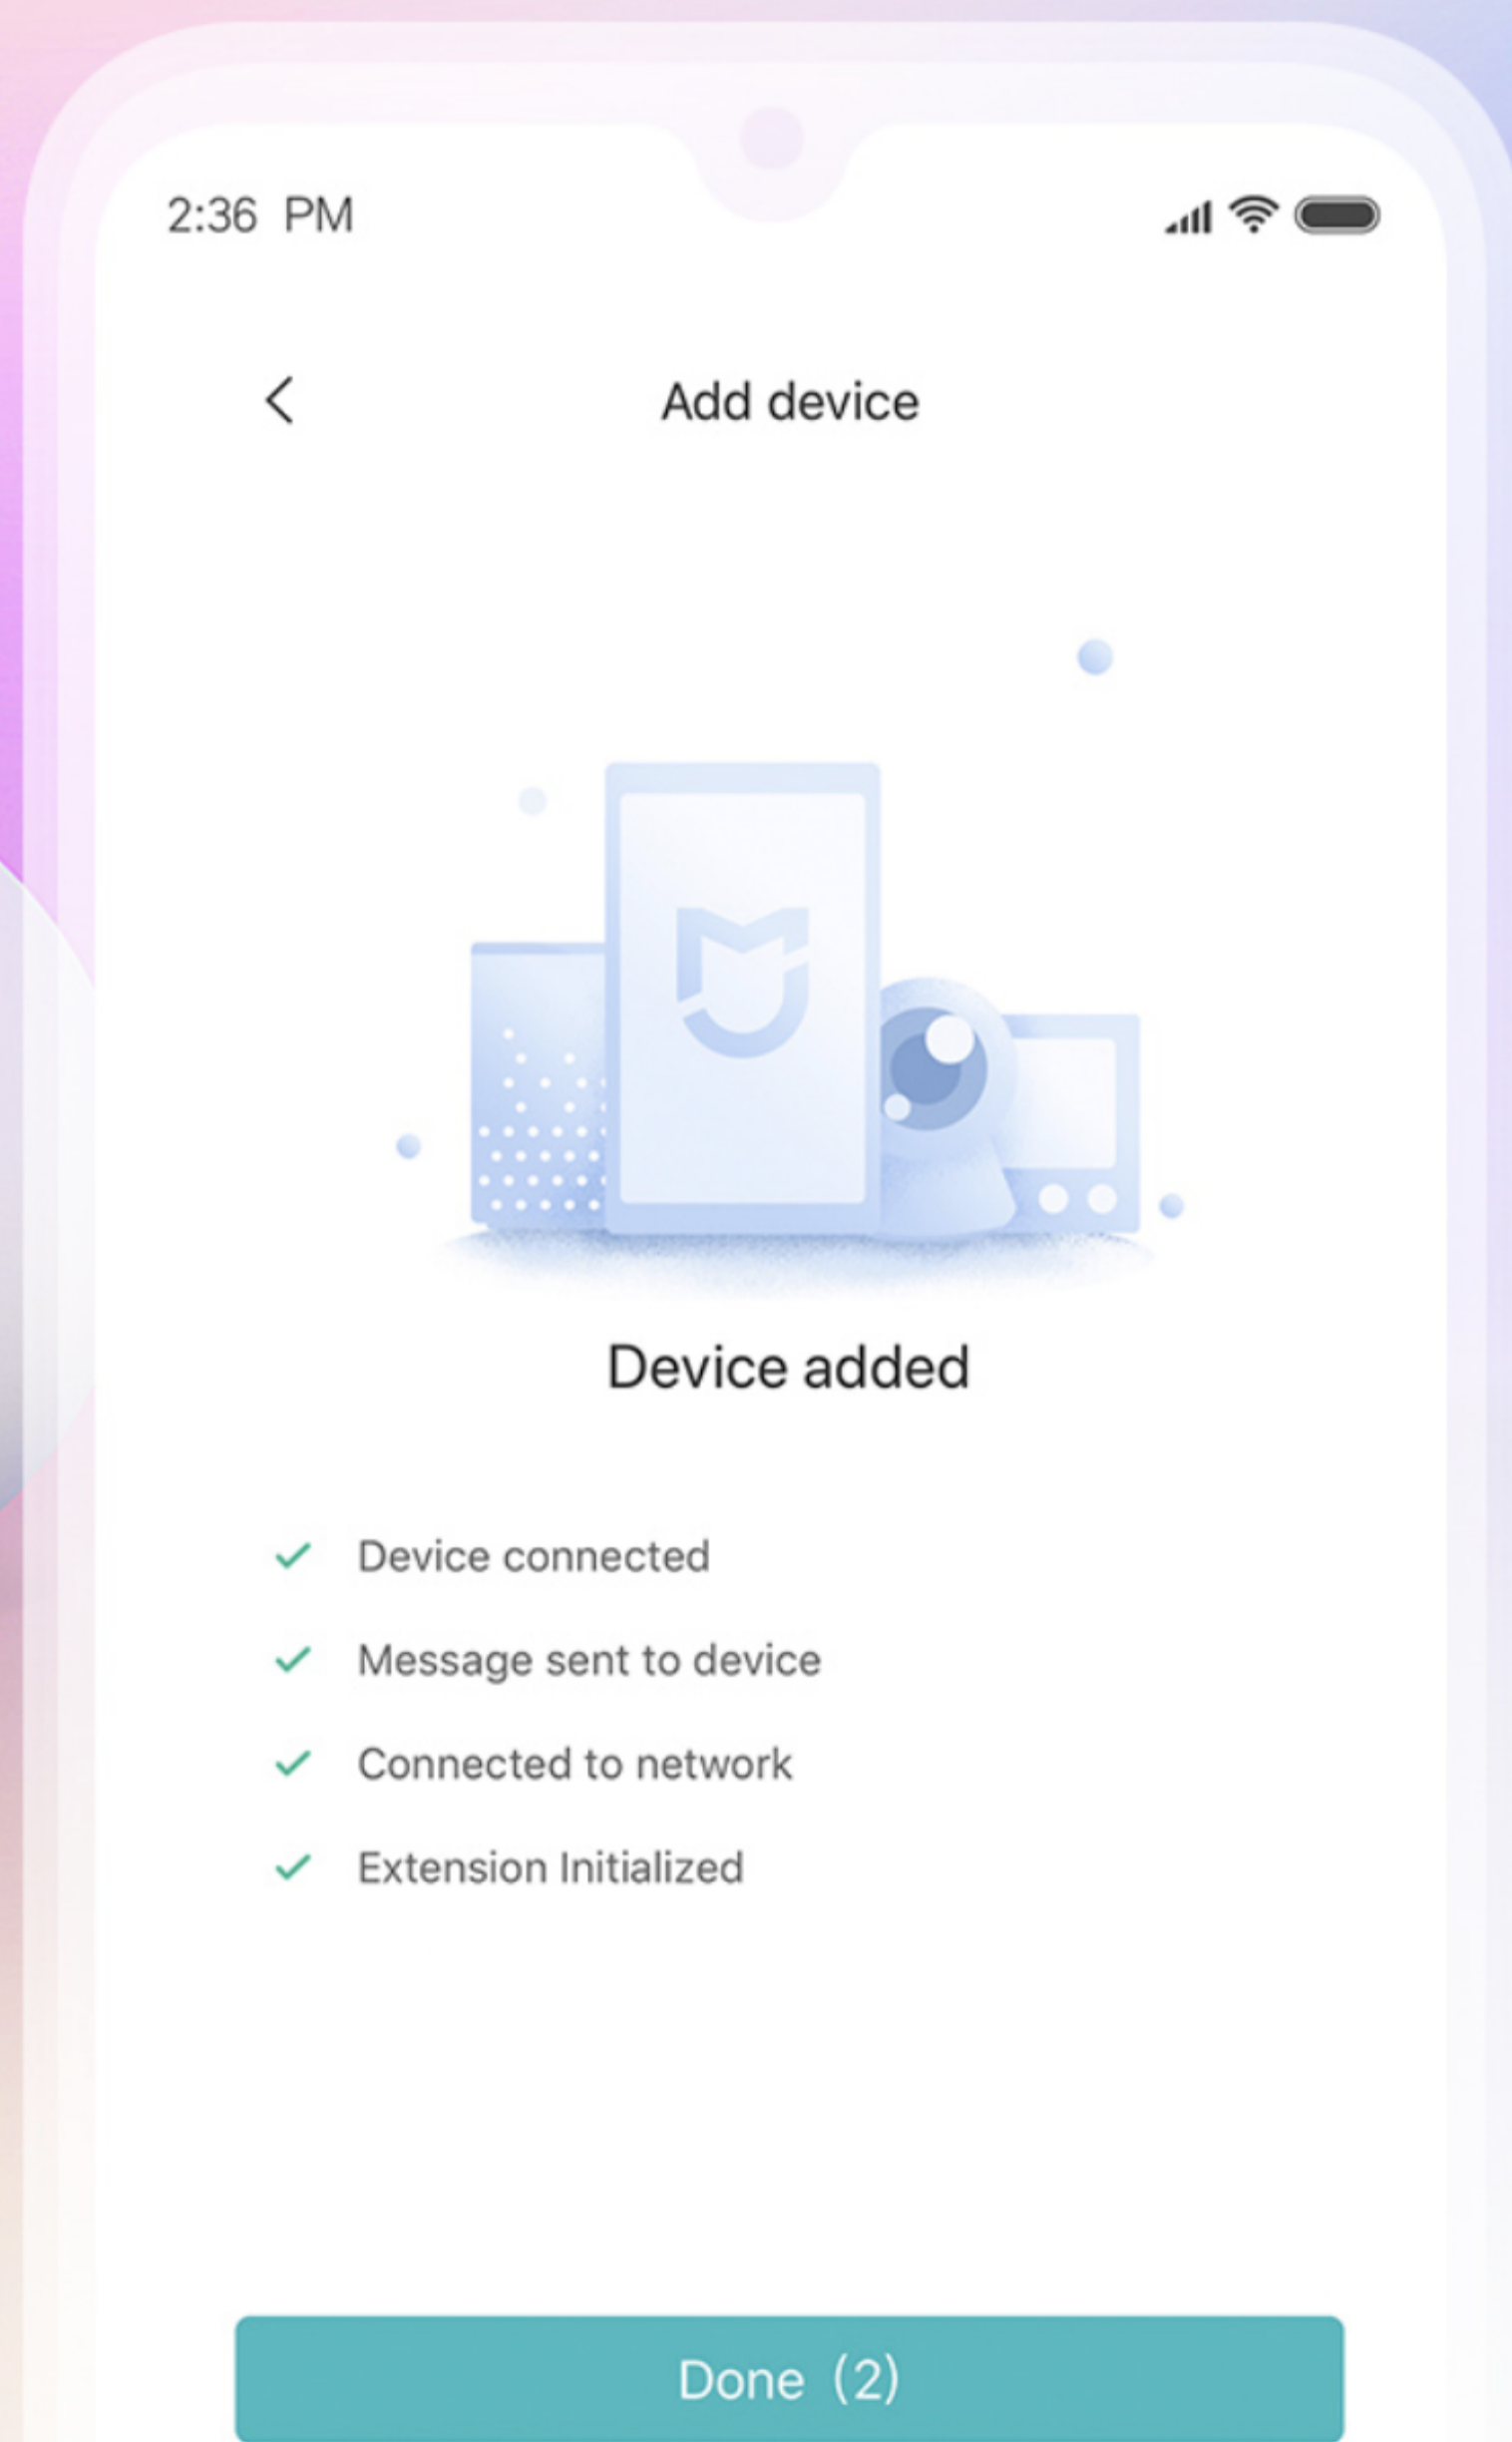

Warm, soft yellow light

A few words are all it takes to activate your dazzling lighting with voice control support

—

Mi Smart LED Bulb has voice control support via Amazon Alexa and Google Assistant. Turn on lights, change colors, adjust brightness and color temperature, or activate Smart Environment with just a few words.

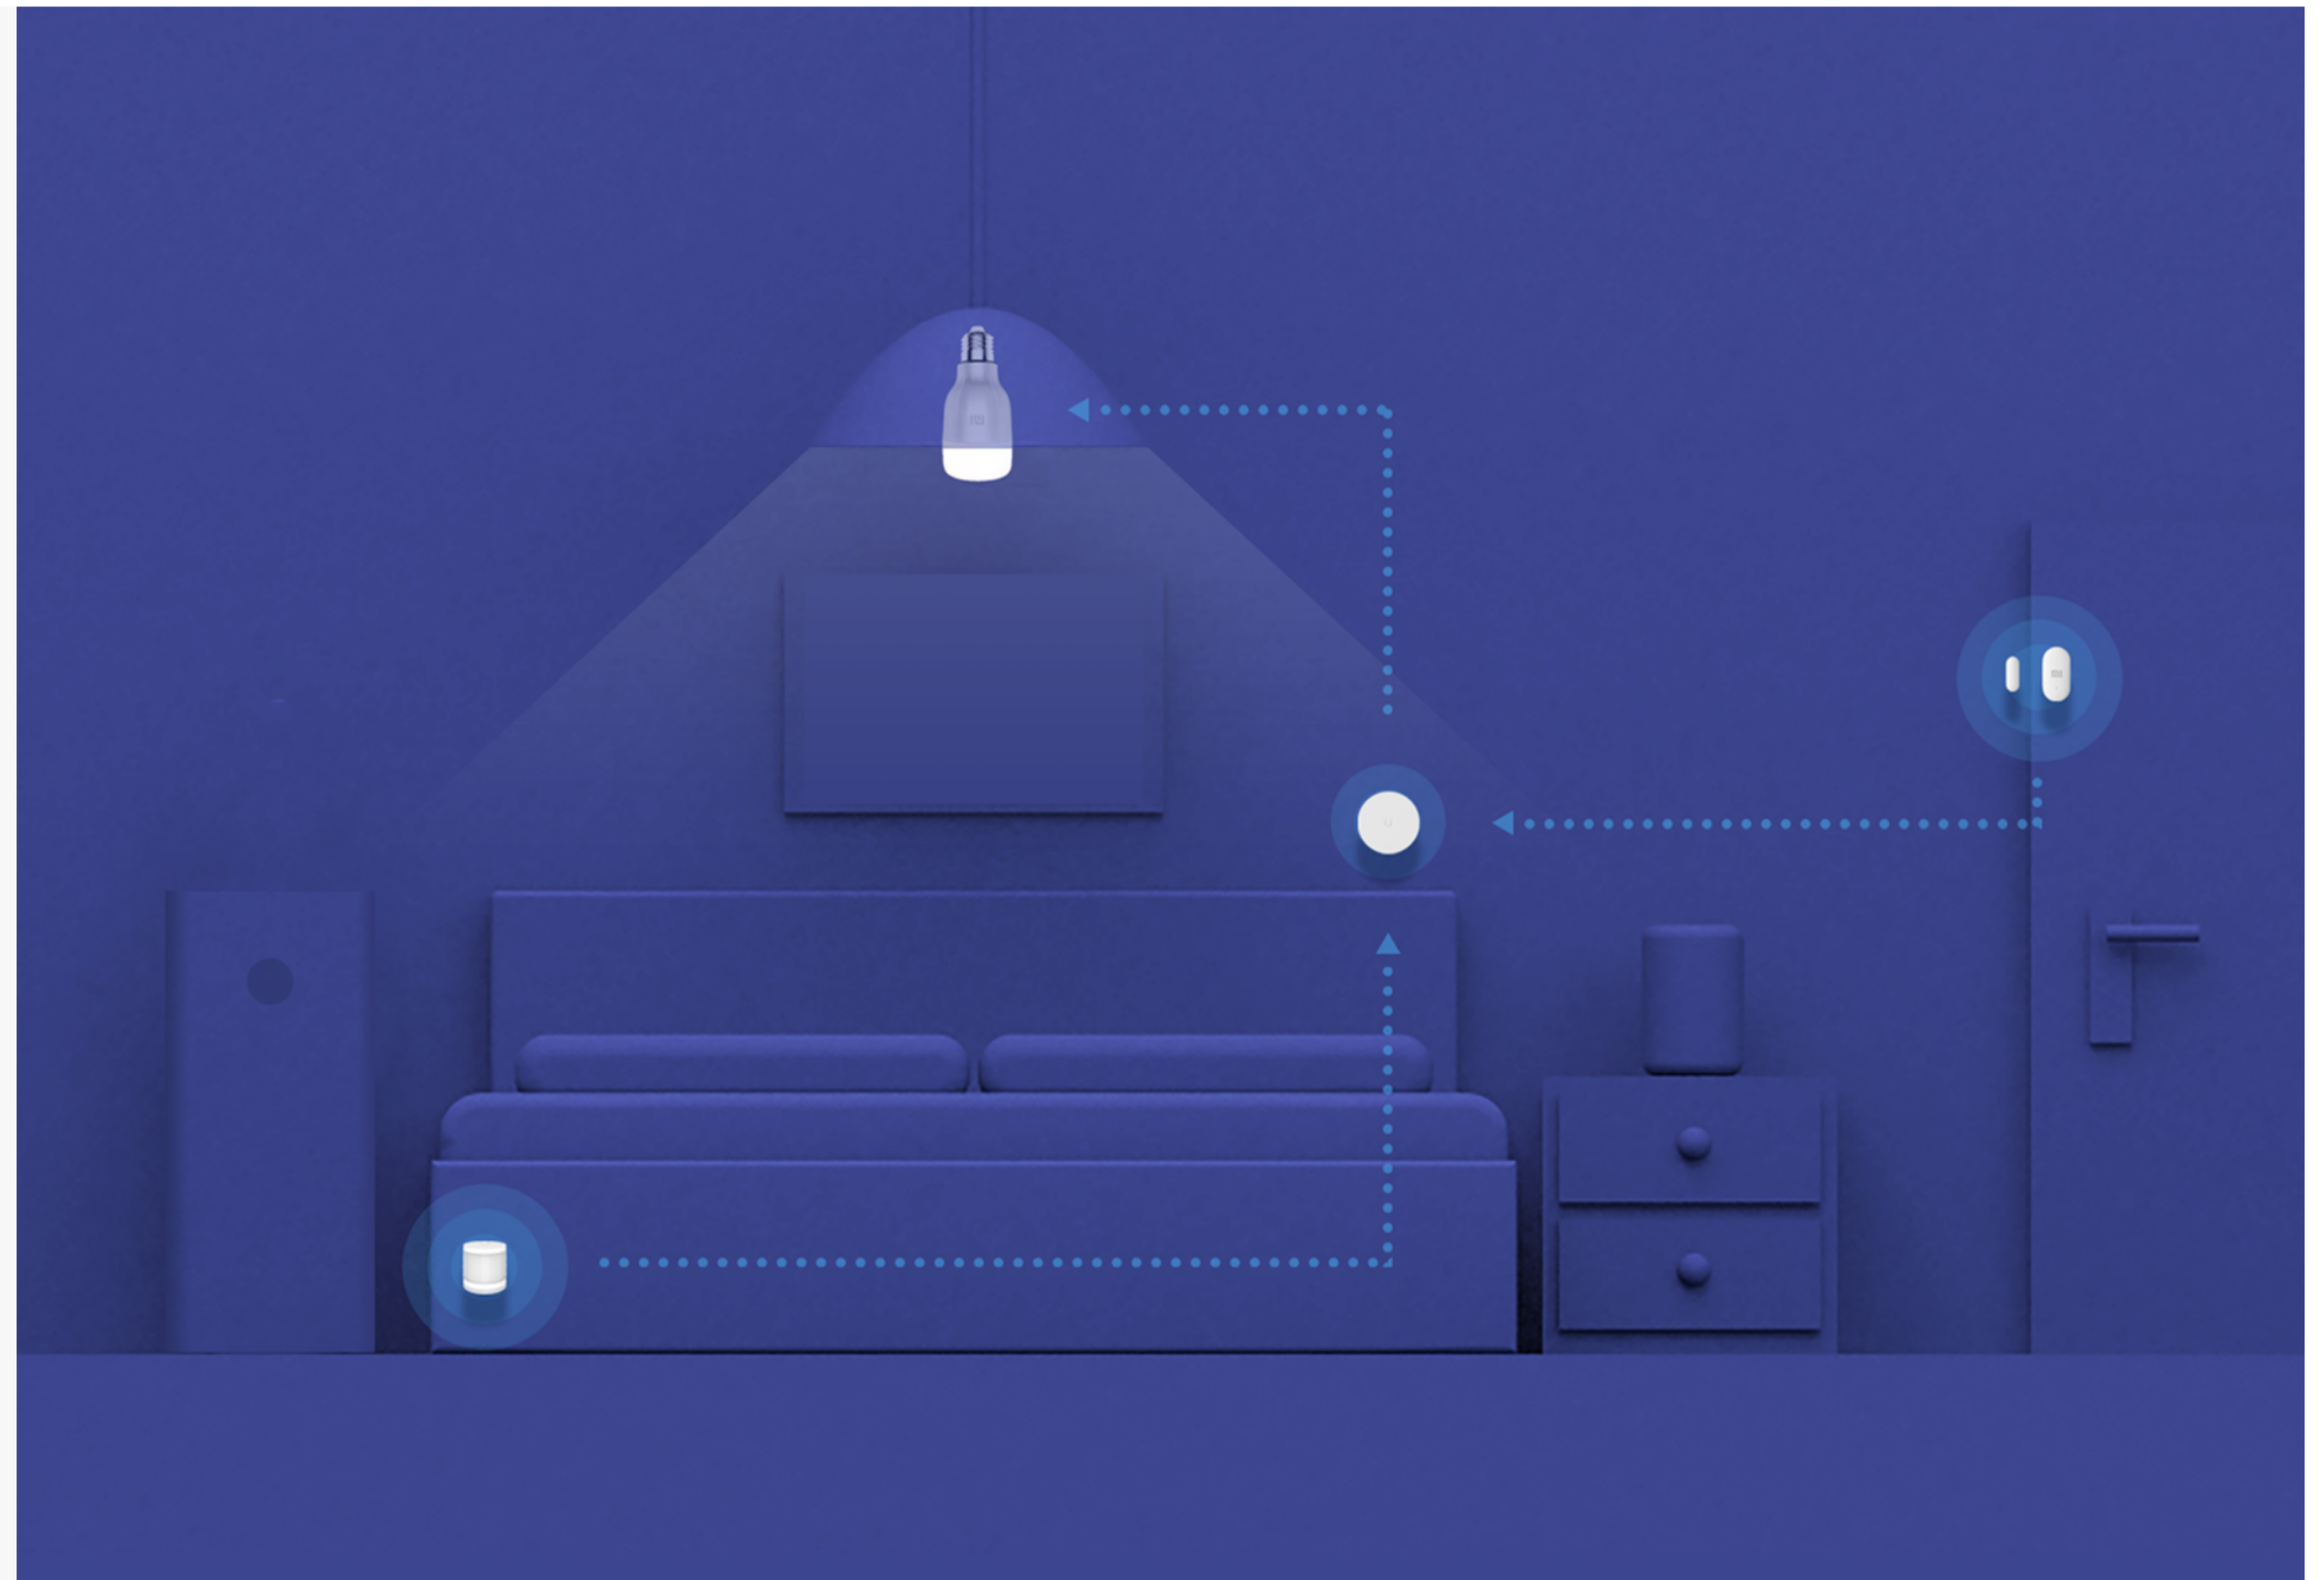

Easy to use smart control

The bulb has a built-in Wi-Fi module that connects directly to Mi Home/Xiaomi Home app via any Wi-Fi network without the need to set up a gateway. In order to customize Mi Smart LED Bulb Essential (White and Color) more to suit your lifestyle, you can enable Color, Flow and Daylight modes as well as more comprehensive settings such as timer and time delay in just a few simple steps.

Connect to Mi smart devices

By connecting Mi Smart LED Bulb Essential to a gateway, you can pair it with other smart Mi devices such as Mi Window and Door Sensor and set the lights to turn on automatically when the door is opened. When connected to Mi Motion Sensor, the light will turn on automatically when motion is detected. Make your life both easier and more colorful.

*Gateways and other sensors sold separately

An environmentally friendly choice with high efficiency lighting and low power consumption

Because it has an optimum electrical profile and optical profile, it provides higher lighting efficiency and lower power consumption. Up to 950 lumens at 9 watts, equivalent to a 69 watt conventional incandescent lamp. Mi Smart LED Bulb is an environmentally safe new bulb option.

* ERP Energy Efficiency Certificate equivalent to 69 W

Durable and high-quality material with a 25,000-hour battery life

The Smart Bulb is lightweight, has a seamless design and distributes heat evenly. The luminous polycarbonate surface with a high refractive index and high transparency provides a bright yet soft light. With a lifespan of 25,000 hours, its battery lasts for 11.4 years when used for six hours a day.
